

Heartland Education Work Group Summary
Monday, May 12th, 2008 10:00 am –11:00 am

- 1) Complete resources for the 6 genetic diagnostic modules on Utah Med Home Portal.
 - A. Down Syndrome
 - B. Neurofibromatosis
 - C. Hurler Syndrome
 - D. Duchenne's Muscular Dystrophy
 - E. Prader Willi
 - F. MCAD

The first four disorders are up on the Utah med home portal, the last two are being developed right now by members of Heartland Collaborative. It was decided to only list genetics clinics and support groups.

- 2) Form work groups to help plan execution, function of PCP education project
Who should be included in the resources?
How should the committee divide up the modules?
What should the modules look like for the Heartland Mirror portal

Education committee members identified members of the collaborative from different states to contact to work on the CME questions for the modules and another group to decide on the design of the web page for the education module.

- 3) CME/CEU next steps – three sites were decided on to provide CME credits.
 - A. OU
 - B. AAP
 - C. ACMG

Need to consider if each state has different requirements for CME credits.
Decision to be made by the PI's of the project.

- 4) Collaborate with University of Iowa's school of nursing – regarding nursing educational resources.
 - A. Collaborative can link on their site educational opportunities available from other institutions
 - B. Future plans for Heartland to sponsor nurses in the region to take some of the courses offered by the University of Iowa.
