***Telemedicine: The Fab 4* is a FREE interactive training for Kansas families who have children with disabilities and/or special health care needs.**

What is the Fab 4?

No, it is not a throwback soundtrack from the 1960's! The Fab 4 are the four essentials for a family centered telemedicine appointment:

1. connection
2. device
3. platform
4. your first telemedicine appointment

We all have barriers in our lives that may keep us from doing something, including having a telemedicine appointment. The good news is, there are ways to bust that barrier and be on your way to a successful family centered telemedicine appointment. #FamilyCenteredTelehealth

The Fab 4 training will help families:

- access health care
- improve experience with healthcare
- reduce stress
- improve communication between all team members and across systems
- improve quality of life and well-being

Presenters

- **Tami Allen**, Co-Executive Director, Families Together, Inc. and the Family-to-Family Health Information Center Project Director.
- **Shannon Ulrich**, Family Health and Education Resource Specialist, Families Together, Inc.
